

## Goals & Objectives

### Oral Medicine Residency Program

<b>Goal and Objective/ Competency and Proficiency/or Program Requirement</b>	<b>Didactic Instruction</b>	<b>Clinical Experience</b>	<b>Evaluation Mechanism(s)</b>
<p>Understanding the pathophysiology and attainment of skills to diagnose and treat soft tissue lesions.</p>	<p>Vernon J. Brightman (VJB) Lecture Series; Oral Pathology Weekly Seminar; S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; Oral and Maxillofacial Surgery History and Physical Examination Lecture Series; Graduate Dental Education (GDE) Curriculum</p>	<p>Hospital Rotations (Oral Medicine Service, Consultation Service); PENN Medicine at Radnor; Comprehensive dental care of medically complex patients (Oral Medicine Clinic [OMC] at School of Dental Medicine [SDM]; Oral and Maxillofacial Surgery Rotation.</p>	<p>-Direct observation during patient care provides an opportunity for immediate feedback of medical assessment for each patient.            -Assessment of case presentations during department conferences.            -Assessment of the number of relevant soft tissue lesion cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.            -Attainment of biopsy skills is determined by the number of cases of biopsies, and the resident's level of understanding as evidenced by direct faculty evaluation during patient care, and performance with case presentations during conferences.</p>
<p>Understanding the pathophysiology and attainment of skills to diagnosis and manage facial pain conditions.</p>	<p>VJB Lecture Series; Oral Pathology Weekly Seminar; S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; GDE Curriculum; Oral and Maxillofacial Surgery History and Physical</p>	<p>Hospital Rotations (Oral Medicine Service, Consultation Service, Anesthesia / Pain Clinic Rotation); PENN Medicine at Radnor; Comprehensive dental care of medically complex</p>	<p>-Direct observation during patient care provides an opportunity for immediate feedback of medical assessment for each patient.            -Assessment of case presentations during department conferences.            -Written feedback from off-service rotations is reviewed throughout the year during review sessions.</p>

	Examination Lecture Series.	patients (OMC at SDM); Oral and Maxillofacial Surgery Rotation; Neuroradiology Rotation.	-Assessment of the number of cases of relevant facial pain cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.
Understanding the pathophysiology and attainment of skills to diagnose and manage viral and fungal infections of the oral cavity.	VJB Lecture Series; Oral Pathology Weekly Seminar; S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; GDE Curriculum	Hospital Rotations (Oral Medicine Service, Consultation Service); PENN Medicine at Radnor; Comprehensive dental care of medically complex patients (OMC at SDM); Oral and Maxillofacial Surgery Rotation	-Direct observation during patient care provides an opportunity for immediate feedback of medical assessment for each patient. -Assessment of case presentations during department conferences. -Assessment of the number of relevant viral and fungal infection cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.
Understanding the pathophysiology and attainment of skills to diagnosis and manage salivary gland dysfunction.	VJB Lecture Series; Oral Pathology Weekly Seminar; S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; GDE Curriculum; Oral and Maxillofacial Surgery History and Physical Examination Lecture Series.	Hospital Rotations (Oral Medicine Service, Consultation Service); PENN Medicine at Radnor; Comprehensive dental care of medically complex patients (OMC at SDM); Oral and Maxillofacial Surgery Rotation; Neuroradiology Rotation.	-Direct observation during patient care provides an opportunity for immediate feedback of medical assessment for each patient. -Written feedback from off-service rotations is reviewed throughout the year during review sessions. -Assessment of case presentations during department conferences. -Assessment of the number of cases of relevant salivary gland dysfunction cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.
Understanding the pathophysiology and attainment of skills to diagnosis and	VJB Lecture Series; Oral Pathology Weekly Seminar;	Hospital Rotations (Oral Medicine Service,	-Direct observation during patient care provides an opportunity for immediate feedback of medical

<p>manage chemosensory disorders.</p>	<p>S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; GDE Curriculum.</p>	<p>Consultation Service, Anesthesia / Pain Clinic Rotation) PENN Medicine at Radnor; Comprehensive dental care of medically complex patients (OMC at SDM); Oral and Maxillofacial Surgery Rotation; Neuroradiology Rotation.</p>	<p>assessment for each patient.          -Written feedback from off-service rotations is reviewed throughout the year during review sessions.          -Assessment of case presentations during department conferences.          -Assessment of the number of relevant chemosensory disorder cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.</p>
<p>Physical and medical risk assessment in medically complex patients and making recommendations for impact and appropriate modifications of dental treatment.</p>	<p>VJB Lecture Series; S. Gary Cohen Conferences; Oral Medicine Clinical Rounds; GDE Curriculum.</p>	<p>Hospital Rotations (Oral Medicine Service, Consultation Service, Internal Medicine Rotation, Anesthesiology Rotation) PENN Medicine at Radnor; Comprehensive dental care of medically complex patients (OMC at SDM); Oral and Maxillofacial Surgery Rotation.</p>	<p>-Direct observation during patient care provides an opportunity for immediate feedback of medical assessment for each patient.          -Written feedback from off-service rotations is reviewed throughout the year during review sessions.          -Assessment of case presentations during department conferences.          -Assessment of the number of relevant cases, and the resident's level of understanding as evidenced by preceptor evaluations, direct faculty evaluation during patient care, and performance with case presentations during conferences.</p>
<p>Critical appraisal of scientific literature and research studies.</p>	<p>VJB Lecture Series; S. Gary Cohen Conferences; GDE Curriculum.</p>	<p>Participation in clinical studies conducted at SDM and / or HUP, when appropriate.</p>	<p>- Direct observation consisting of assessment of classroom participation; preparedness (reading assignments); demonstration of understanding of research study design, patient selection and randomization, various study types, statistical analyses, and validity of findings; faculty evaluations.</p>
