

A State-of-the-Art Environment for Training and Treatment

LEADERSHIP COMES FROM STAYING
AT THE FOREFRONT OF THE PROFESSION.

In 1915, the Thomas Evans Building was the most advanced dental teaching facility in the nation. In its halls, you can feel the tradition of excellence that stretches back across generations. The spirit of the pioneers who taught and learned here is tangible in the clinics; the classic architecture exudes the proud history of the dental profession.

TODAY, WE NEED TO MOVE THAT TRADITION
OF EXCELLENCE INTO THE FUTURE.

Our new Main Clinic will be the most state-of-the-art student dental clinic in the nation. While preserving the building's architectural details, the renovation will create 74 operatories with the latest technology. Picture this: Wireless computers with dental practice management software in every station to eliminate paper charting and streamline operations. Grading, billing, scheduling, case research? All available chairside. Digital radiography to optimize the X-ray process. Privacy and ergonomics on par with private practices. These upgrades will keep our students and faculty in the vanguard of dental science and practice, ready to lead the transformation of this field.

We have a rare opportunity to bring this vision to life. With your support, we can transform this unique facility and provide our students, faculty and patients with the preeminent environment for dental medicine.

**TO BUILD A PREMIER ENVIRONMENT
FOR TRAINING AND TREATMENT, WE SEEK
TO RAISE \$17.5 MILLION.**

SETTING A NEW STANDARD

“Penn Dental Medicine has all the brainpower you could ask for, from world-renowned researchers and educators to top-of-the-class students. What we need is a clinical facility that meets those same high standards. Picture the difference that will make to our work with students, with patients. It’s dramatic. We’ve seen it happen in other areas like the Brainerd F. Swain Orthodontic Clinic and the Walter Cohen and Morton Amsterdam Periodontal Clinic. And when the transformation of the Evans Building is complete, we will have set a new standard for dental medicine.”

— Joseph P. Fiorellini, DMD, DMSc, professor and chair of the Department of Periodontics

AN AWARD-WINNING RESEARCHER, Dr. Fiorellini’s studies of the genetic basis for periodontal disease and the regeneration of disease-damaged tissues hold great promise for new oral surgery applications. His work underscores the importance of facilities that evolve along with technology and support the latest advances in research, training and delivery of care.

Naming Opportunities

MAIN CLINIC:

Clinic	\$1,500,000
East Wing	\$750,000
West Wing	\$750,000
Marble Stairwell to the Main Clinic	\$100,000
Reception Area	\$100,000
Office of Associate Dean for Clinical Affairs	\$75,000
Consultation Room (Two available)	\$50,000
Digital Imaging Center	\$50,000
Operatories (74 available)	\$25,000

ENDODONTIC CLINIC:

Clinic	\$1,000,000
Reception Area	\$200,000
Surgical Suite	\$150,000
Department Chair's Office	\$100,000
Conference Room	\$75,000
Operatories (20 available)	\$50,000

Will You Join Us?

THE THOMAS EVANS BUILDING REMAINS
THE HEART OF PENN DENTAL MEDICINE.

Every student learns the art and science of dentistry in the Main Clinic, continuing a rich tradition our alumni will remember well. And while changes to dental technology have led to a major renovation nearly every two decades, some aspects of the space remain timeless, like the quality of training and care performed in the clinic for generations.

Today, rapidly evolving technology and procedures in dental medicine have again led to the need for renovations. This project will be the largest undertaking since the construction of the Robert Schattner Center and it will further emphasize that Penn Dental Medicine is an institution that embraces its history while pursuing the future.

To renovate the Thomas Evans Building, including the Main and Endodontic clinics and the already completed Walter Cohen and Morton Amsterdam Periodontal Clinic, we seek to raise \$17.5 million. This funding will enhance the learning environment for students and faculty and ensure that we continue to provide unsurpassed treatment to our community.

Will you join us in making an impact on dental education, care and research? With your investment in Penn Dental Medicine, we can continue leading the profession — together.
